PART IV - If this is a JUSTIFICATION FOR VARIANCE

The Zoning Board of Adjustment may not authorize a zoning ordinance variation unless ALL of the following criteria are met. Please provide evidence that the requested Variance complies by addressing the issues below.

1. Special conditions exist such that literal enforcement of the Ordinance will result in
unnecessary hardship to the applicant as defined under applicable law
The lot is only .22 acres, the resident's house and shed are within the set backs. The resident connect
build anything on his lot without a variance. There is no other place to put the array on this lot.
2. Granting the variance would be consistent with the spirit of the Ordinance.
The resident had already been approved for a variance to build a pergola in the same spot where the array is goin
3. Granting the variance will not result in diminution of surrounding property values.
Granting the variance will not result in diminution of surrounding property values. Solar increases the
property value. There is no noise or odor from the array.
4. Granting of the variance would do substantial justice.
The variance will not injure the rights of others, or undermine public interest. There is no other place to put
the array on this lot. The applicant currently resides at the residence while the abutters are seasonal residen
5. Granting of the variance would not be contrary to the public interest.
· · · · · · · · · · · · · · · · · · ·
Granting of the variance will not be contrary to public interest. Solar is clean, efficient energy that is not
harmful to the environment.
PART V — If this is a JUSTIFICATION FOR SPECIAL EXCEPTION
Please provide evidence that the requested Special Exception complies by addressing the issue
below.
1. No detriment to property values in the visinity of the
- 27 TO WELL MICHIELD PLODES BY VALUES IN THE VICINITY OF THE PROPOSED A development will
account of: the location or scale of buildings, structures, parking areas, or other access ways; the
emission of odors, smoke, gas, dust, noise, glare, heat, vibration, or other pollutants; or unsightly outdoor storage of equipment, vehicles, or other materials.
- State and a squipment, venicles, or other materials.
2. No hazard will be caused to the public or adjacent property on account of potential fire,
explosion, or release of toxic materials.
Page 4 of 6 Revised 07/01/2013

ReVision Energy, Inc. in conjunction with our customer, Byard Mosher, are requesting a variance to install a pole mounted solar array on the parcel of land stamped as Map 125 Lot 10, 507 McDaniel Shore Drive, Barrington, NH.

The proposed pole-mounted solar array would reside in the northeast corner of the lot. It will not create any noise, smoke, glare, traffic obstructions, or a demand on water. It will generate clean, 100% renewable energy for the residence. Any solar produced energy not used by the residence will go directly into Eversource's power grid.

Because of the small parcel of land (.22 acres), the placement of the solar array will impede the set back requirements of 40 feet front and 30 feet side standards. The array will sit 14 feet from the road and 5 feet from the side property line. The front of the property slopes down from the road, and there is a tree line on the side of the property to minimize view of the array from the road and abutter.

The array itself is 298 square feet and consists of 12 solar panels and 12 Enphase micro-inverters. There will be an additional 4 solar panels and micro-inverters installed on the roof of the shed that sits in the southwest corner of the property. Construction of the array itself, and the 4 additional panels, will take less than a week.

SITE / CONTEXT PHOTOS

Using Guidelines Below

Provide color photographs showing the site and surrounding buildings/properties in order to provide staff, boards and commissions with a visual impression of the current site conditions.

- 1. Photos are to be taken looking toward the site and adjacent to the site.
- 2. Photos should show adjacent improvements and existing on-site conditions.
- 3. Number the photographs according to view.
